

Day 3

FISHREG
Maritime Affairs Unit - IPSC
European Commission
Joint Research Center

Where are we?

In two days we have covered:

1. Install and start running R and RStudio
2. Find help and support
3. Get to know the R language basics
4. Create objects of various classes (vector, data.frame)
5. Load data stored in text files
6. Plot data and results
7. Data exploration and analysis
8. **for** loops
9. Mapping

<https://github.com/iagomosqueira/RforFisheries>

Today

- Introduce **arrays**
- Introduce **FLCore** package
- **FLQuant** - the heart of **FLCore**
- **FLStock** objects
